Professional Summary

Software Developer with over 3.5 years of experience designing, building, and supporting enterprise applications. Possessing a solid foundation in backend development, system integrations, and operational reliability, I specialize in the C# (.NET) ecosystem, SQL, and RESTful APIs. Currently completing an Advanced Diploma in Application Development (NQF 7), I bring working knowledge of Microsoft Azure and a pragmatic mindset that balances ideal architecture with business reality. I take end-to-end ownership of the SDLC and am highly focused on delivering stable, scalable, and auditable business solutions.

TECHNICAL COMPETENCIES

Core Development (Backend & Frontend)

- Backend: C# (.NET), ASP.NET Core MVC.
- Frontend: React, JavaScript, TypeScript, HTML, CSS.
- APIs: RESTful APIs (JSON, HTTP), API integration and architecture.

Data, Cloud & AI Integration

- Databases: SQL Server (T-SQL), structured data modeling, and performance optimization.
- Cloud: Microsoft Azure (App Services, Cloud SQL), AWS - working knowledge of cloud-hosted application environments.
- AI Exposure: Integration of AI models and API driven cognitive services to enhance workflow automation and data processing

Software Engineering & Operations

- SDLC: Full lifecycle management across Dev, Test, and Production environments.
- Design: Configuration-driven feature design, enterprise system integration patterns, and UI usability enhancements.
- Methodologies: Agile Scrum, ITIL 4 Foundation (Incident & SLA management), and technical documentation.

EDUCATION

Advanced Diploma: Application Development (In Progress) Rosebank College, *Current Qualification NQF Level 7*

- Enrolled as a final-year student.
- Core Modules: Application Development Security, Cloud Development (Azure, AWS), Enterprise Systems, and Research Methodology.

National Diploma: Information Technology (Software Development) Central University of Technology, Free State | **Completed**

Laserfiche Gold Certification | **Completed**

FNB App Academy Graduate Certificate First National Bank / IT Varsity | **Completed**

- Foundational immersive in full-stack engineering and banking logic.

ITIL® 4 Foundation Certificate in IT Service Management PeopleCert / AXELOS | **Completed**

PROFESSIONAL EXPERIENCE

- **Junior Developer at AFGRI Group Holdings** | *August 2023 to February 2026*

- Designed, developed, and supported over 40 internal automated business workflows that integrated tightly with core enterprise platforms.
- Built and maintained robust backend logic and RESTful APIs utilizing C# and SQL to ensure stable data flow between internal applications and external systems.
- Gained exposure to modernizing internal systems by researching and integrating AI enabled features via REST APIs to improve automated decision making and data extraction.
- Implemented configuration driven features across various systems to minimize hard coded logic, improving overall maintainability and scalability.
- Contributed to frontend usability by developing UI enhancements, including validation feedback and status tracking for business users.
- Analyzed and improved application performance through background processing, SQL optimization, and backend architectural refinements.
- Performed controlled software deployments and hot patches across Development, Test, and Production environments with zero unplanned business disruption.

- **IT Graduate – Application Support Datacentrix (Pty) Ltd** | **September 2022 – August 2023**

- Supported business users and stakeholders during testing, UAT, and system rollout phases for enterprise applications.
- Structured and managed data logs to support internal reporting, technical audit requirements, and issue traceability.
- Delivered realistic technical input into timelines and risks while resolving escalated support incidents within strict SLAs.
- Provided end to end ownership of application support queries, communicating technical fixes clearly to non technical stakeholders.

IT Lab Assistant Central University of Technology | *April 2021 – February 2022*

- Maintained physical and network security protocols for university computer laboratories.
- Assisted students and faculty with secure login procedures and basic technical troubleshooting.
